AUTOPAD

The AutoPad cash repair estimating system has been intentionally designed and developed for both handheld devices (such as tablets or iPads) and PCs (including laptops and desktops). It is a straightforward and accurate estimating system with built-in on screen approval by using electronic signature technology.

AutoPad Can Do

- Import daily service bookings from your DMS

- Simple to use at the vehicle in front of your customer where estimate is created using touch screen technology

- Communication function to communicate with vehicle owner which allow the service advisor to clearly demonstrate the damage area or repair required

- Can be used at vehicle check in

- Appraise the vehicle and provide instant pricing

- Upload photographs and video

- Upload & store photographs and documents

- Remote vehicle estimating

- Daily operating controls and KPI reports

- On-line payment gateway

Benefits

| Manages the customer interface | Accessible from any location | Fast, efficient and accurate | Controls and optimises pricing | Real time link to Bodynet (Bodyshop Management System) |

| Simple and professional quotation to customers | Integrates with existing dealer management systems | Vehicle and customer lookups to reduce data entry | Accessible from a wide range of devices | Easy to use |

AutoPad Can Help:

- Reduce estimate creation time

- Produce accurate estimates

- Facilitates quotes without the need to have the vehicle on-site

- Can handle both cars and commercial vehicles

- Instant authority with using digital signature and fast approval

- Adding and marking damages can be done digitally on the car diagram

Who Can Use:

- Estimator

- Service Advisor

- Sales Staff

- Account Manager

- Workshop Manager
